

Correction sujet épreuve pratique bac NSI

Exercice 1 :

```
déf renverse(mot) :
```

```
    s = ""
```

```
    for c in mot :
```

```
        s = c + s
```

```
    return s
```

Exercice 2 :

```
def crible(n):
```

```
    """Renvoie un tableau contenant tous les nombres premiers
```

```
    plus petits que n."""
```

```
    premiers = []
```

```
    tab = [True] * n
```

```
    tab[0], tab[1] = False, False
```

```
    for i in range(n):
```

```
        if tab[i]:
```

```
premiers.append(i)
multiple = 2*i
while multiple < n:
    tab[multiple] = False
    multiple = multiple + i
return premiers
```
